PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate with hands-on experience in Python programming, machine learning, data preprocessing, REST API integration, and AI application development. Developed predictive models and computer vision solutions through academic projects, internships, and hackathons. Participated in Generative AI innovation through an AI-powered marketplace assistant project. Strong foundation in problem-solving, software development, and database concepts, with an eagerness to learn Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and AI agent development.

TECHNICAL SKILLS

Programming: Python, Java
Generative AI: Generative AI Fundamentals, Prompt Engineering, LLM APIs, RAG, AI Agents, Tool Calling, AI-Powered Applications
AI & Machine Learning: Supervised Learning, Classification, Regression, KNN, Decision Trees, Random Forest, Naive Bayes, Deep Learning
Data Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV
Backend & Web Development: Flask, REST API Integration, HTML, CSS, Flutter | **Databases:** SQL, MySQL, DBMS, SOLite
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming | **Data & BI:** Microsoft Excel, Power BI
Tools & Technologies: Google Cloud Platform, Kubernetes, Minikube, Locust, Git, GitHub

PROJECTS

SmartSupport AI – Real-Time Customer Support Automation / *Python*, *FastAPI*, *LLM API*, *RAG*, *LangChain*, *ChromaDB*, *SQL*, *Streamlit*

- Developed an AI-powered customer support chatbot using RAG to retrieve relevant information from FAQs and company policies and generate contextual responses using and LLM API.
- Integrated REST APIs, SQL database operations, and tool colling to support order-status lookups and ticket creation, with source references and fallback responses for improved reliability.

Disease Prediction System | *Python*, *Scikit-learn*, *Pandas*, *NumPy*

- Benchmarked 5+ supervised machine learning algorithms on a dataset of 1,000+ records, achieving approximately 80% prediction accuracy through systematic model tuning.
- Preprocessed 1,000+ records and refined input features using Pandas and NumPy to raise model input quality.

Kubernetes Auto-Scaling Simulation | *Kubernetes*, *Minikube*, *Locust*

- Simulated Kubernetes Horizontal Pod Autoscaling (HPA) behavior across a 3-tool stack (Kubernetes, Minikube, Locust) using real-world workload traces to model production traffic patterns.
- Generated workload using Locust and deployed the application on Minikube to measure scaling responsiveness and resource utilization.
- Pinpointed performance bottlenecks by analyzing scaling behavior and resource utilization, building understanding of cloud-native workload management.

SheSafe – Women Safety System | *Flask*, *SQLite*, *OpenCV*

- Built a web-based women safety application with 4 core features: emergency SOS alerts, live location tracking, evidence capture using OpenCV, and emergency contact management.
- Delivered a secure, user-friendly emergency response solution using Flask and SQLite.

PROFESSIONAL EXPERIENCE

Flutter Developer Intern — Abservetech Pvt. Ltd. | *2025*

- Produced cross-platform mobile application UI screens using Flutter and Dart and Integrated REST APIs and added application navigation features to enhance user experience.
- Collaborated with team members using Git and GitHub for version control and code management.

Machine Learning Intern — Anjana Infotech | *2025*

- Trained machine learning models using Scikit-learn on structured datasets.
- Boosted model performance through feature selection and hyperparameter tuning.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science | *Expected 05/2027*
Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Database Management Systems, Big Data Analytics, Object-Oriented Programming, Data Visualization, Cloud Computing Fundamentals
CGPA: 8.01/10.0

Higher Secondary Certificate (HSC), State Board | *2023* | *Score: 68%*

Secondary School Leaving Certificate (SSLC), State Board | *2021* | *Score: 100%*

ACHIEVEMENTS

- Winner – Smart Marketing Strategy Challenge, National Level ECLearnix Hackathon 360° (2025).
- Participant – Adobe University Hackathon 2026, organized by Adobe.
- Completed Google Cloud Jams Program, gaining hands-on experience across 6 Google Cloud Platform (GCP) service areas: compute, storage, networking, security, DevOps, and cloud operations.
- Conceived and presented AI/ML-based solutions at multiple hackathons and technical events.
- Built an AI-powered marketplace assistant using Generative AI during the GenAI Exchange Hackathon 2025 by Google Cloud.
